Education

Maharishi Dayanand University

Bachelor in Computer Science & Technology (CGPA: 7)

OCT 2021 – MAY 2025

New Delhi, India

Harcourt Butler Sr Sec School,

High School with PCM | with Computer Science C++ (Percentage: 73%)

MAY 2018 – JULY 2020

New Delhi, India

Experience

[Innodata](#)

AI/LLM Analyst (Fixed Term)

Dec 2025 – Feb 2026

Remote, Noida

- Developed **Python scripts** to filter & categorize Multimodal data, increasing QA ingestion speed by **30%**.
- Applied Python-based scene detection to automate video partitioning and high-quality metadata extraction.

[Horecamate](#)

Intern -> Software & Application Developer (Full Time)

July 2024 – July 2025

Hybrid, Noida

- Built **cross-platform Flutter e-commerce app** with AR features using Sys design concepts, serving **50+ users**.
 - Integrated **Supabase** for secure auth, real-time DB, and scalability; designed **REST APIs** with Node.js/Express.
 - Applied **MVVM architecture, SOLID principles**, and clean code for Scalable & modular development.
 - Optimized app performance, reducing load time by **45%** and API latency by **30%** via caching and indexing.
-

Projects

[Total tabs Exporter](#)

Firefox Extension,

May 2026

New Delhi, India

- Designed polymorphic formatter engine with factory registry to convert tab trees to Markdown, JSON, HTML .
- Implemented efficient **business logic** with deployment capabilities.
- Built modular ES6 WebExtension pipeline with async processing to avoid main-thread blocking.

[gitprofile](#)

Feature Contributor,

April 2024

New Delhi, India

- Implemented **dynamic generation of 5+ social links**, accommodating a wide range of platforms.
 - Successfully **merged changes** into the live project following comprehensive **testing and quality assurance**.
 - Live at** : programer3.github.io
-

Skills Summary

Programming Languages & Frameworks: MERN stack, C++, Java, Flutter, Riverpod, Hive, Django, Pandas

Tools & Databases: Git, Shell, SQL, MongoDB, Office 365, MD, Docker.

Technical Skills: Linux, Rest APIs, Data Structures & Algorithms, OOP, Design Patterns.

Soft Skills: Teamwork, Communication, Analytical Thinking, Adaptability, Creativity.

Languages: English, Hindi.

About

- Proactive Open-Source Contributor & [GSSoC Alumni](#):** Possessing strong problem-solving abilities, and a passion for collaboration and continuous improvement.
- Results-Driven Innovator:** Adept at tackling complex challenges and delivering user-centric solutions in front-end, full-stack, and related roles.
- Led 5+ open-source projects**, including a [Game in GODOT Engine](#) featuring infinite procedural map generation.
- Learned Version Control, CI/CD workflows and Deployments during **Github Education Program** fellowship.
- A tech-savvy and inquisitive learner who embraces a **practical, hands-on approach**.
